Mile 2	**17:42**
Mile 4	**35:24**
Mile 6	**53:07**
Finish	**55:00**

How to use

1. Cut the strips along the dotted lines. The every 2 mi strip reads at a glance on your wrist; keep the mile strip in a pocket or under your bib.

2. Protect it with wide clear tape, then fasten it to your wrist with a rubber band or under your watch strap.

3. Times are elapsed from when you cross the start line (chip time). In a race with wave starts, the official clock may show more.

4. Stick to your times early on, even if you feel good: time banked too soon is often paid back in the last quarter.
